

PROJECT SPECIALIST (PS)

Victoria Golf Club

ABOUT VICTORIA GOLF CLUB

The Victoria Golf Club (VGC), founded in 1893, is the oldest 18-hole golf course in Canada in its original location, and the second oldest in North America. A links-style course, the dynamic relationship between the golfer and the environment is more closely knit than ever at VGC. Designed as nature allows, the golf course is best experienced while walking and enjoying the magnificent West Coast environment.

JOB SUMMARY

Joining a passionate turf care team, under direction from the Superintendent and Assistant Superintendent, the PS will conduct regular fertilization practices, assist in irrigation projects and be a part of major project planning. The successful applicant must be a proactive leader and lead by example to ensure a high-quality product is put out each day by the turf care team.

- Assist, plan, and contribute with fertilization and pesticide applications, and cultural practices
- Coordinate with the entire turf care team and management team
- Proficient in all aspects of landscaping and operating equipment including sod cutter, track loader, excavator, tractors and utility vehicles
- Contribute and work on major projects with both short and long-term goals to continually improve the experience at the golf course
- Maintain all aspects of the property to its highly detailed standards
- Maintain daily communication with the Superintendent and Assistant Superintendent
- Ensure nightly irrigation requirements are met
- Assist in the training and mentoring of the turf care team to develop a strong cohesive environment including, equipment operation, irrigation techniques, safety orientation and ongoing training
- Assist the Superintendent with golf course record keeping, including fertilization, training checklists, and material inventory
- Assist in the development of training materials for easier onboarding of new staff members to the turf care team
- Maintain a strong communication with other managers and management, as well as other members of the team on the daily golf course requirements
- Continued education as required for the position
- Other requirements as directed by the Superintendent and Assistant Superintendent

WHAT YOU BRING

- Work towards and obtain a valid B.C. Pesticide Applicators license
- A strong understanding of the game of golf and how every little change at the course affects the outcome of every swing for customers
- Strong leadership skills to manage and encourage a team of maintenance staff
- Experience with toro Lynx irrigation software and rainbird rotors
- Excellent problem-solving capabilities and adaptability to changing conditions
- A proactive approach to both leadership and course maintenance
- Dedication to upholding the golf course standards and enhancing its visual appeal
- Valid class 5 driver's license
- Previous excavator experience is an asset

WORKING CONDITIONS

- Consistent hours and days per week
- Industry leading facilities
- Great team atmosphere

If you are a motivated individual with a keen eye for detail and you enjoy working outside, join our team and contribute to the success of our organization.
